# Why Ocean Energy?

2020  
20% RES

2030  
27% RES

2050  
80%-95%  
decarbonisation

# Don't take my word for it

*Ocean energy has a big role to play in our clean energy package. It can meet up to 10% of the EU's power demand by 2050, equivalent to cutting 276 million tonnes of CO2 every year.*

#CleanEnergyEU

***Karmenu Vella***

*Commissioner for the Environment and Maritime Affairs*

# Initiatives

## Political support

### DG MARE

Blue Growth

- Ocean Energy Forum
- Market study
- Environmental Monitoring

## R&D funding

### DG RTD

SET-Plan

- Horizon2020

## Demonstration funding

### DG CLIMA

Emissions Trading System

- NER300 (leftovers)
- Innovation Fund

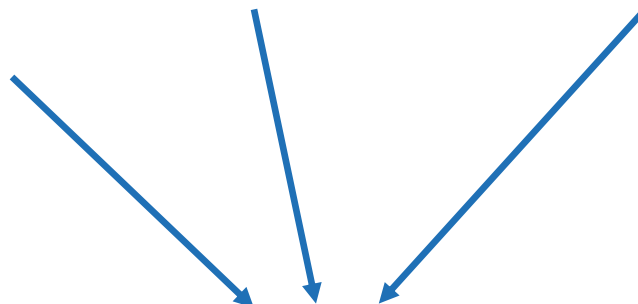

## Other funds

### DG ENV

- Life +

### DG REGIO

- Structural funds

- Financing products
- InnovFin EDP
