ALGAplus

Promote
entrepreneurship
and innovation

ALGAplus is a small company based in Ria de Aveiro, Portugal, devoted to the production of seaweed and seaweed based products in a controlled environment, with organic certification, a sustainable production under the Integrated Multi-Trophic Aquaculture (IMTA) concept, and a strong focus on R&D.

ALGA+® seaweeds are the solution for food and cosmetic companies seeking a natural but customized ingredient assured with quality, traceability, stability of supply and a small carbon-foot print that can help differentiate their products. To boost the seaweed market, the company launched the brands ALGA+® (bulk seaweed), Tok de Mar® (food products) and SeaOriginals (well-being products).

Outcomes of the project

- With inventive R&D and communication, ALGAplus helps rejuvenating a traditional seaweed industry in Portugal,
- At national as well as European level, ALGAplus is boosting interest in the sector through several EU funded projects relating to the production of seaweed and seaweed based products like [CIGArRA](#) (FEP), FP7 and LIFE projects.
